

# HARSHIT HARSH

Aspiring Software Engineer

## ABOUT ME

I'm currently a student at MMMUT, Gorakhpur. I'm learning Machine Learning and also DSA and CP in C++. I have few projects of Web-Development, Python, C++, and Machine Learning.

## EDUCATION

### Bachelor of Technology

Madan Mohan University of Technology, Gorakhpur  
2025-2029

## SKILLS

- Programming Languages: C++, C, Python, JavaScript
- Core Computer Science: DSA, CP, OOPS
- Web Development: HTML5, CSS3, JS
- Machine Learning: Scikit-learn, Pandas, NumPy, Data Pre-processing
- Tools & Platforms: Git/GitHub, Jupyter Notebook
- Time Management
- Team Collaboration

## LANGUAGES

- English
- Hindi

 Bodhgaya, Bihar

 [LeetCode](#)

## PROJECTS AND ACHIEVEMENTS

### 1. Competitive Programming & DSA

- HackerRank: Achieved 4-Star (Python), 3-Star (C), and 2-Star (C++) rankings.
- LeetCode: Actively solving problems to master  $O(n)$  and  $O(\log n)$  time complexities.

### 2. Machine Learning & Data Science

- Dataset Curation: Developed two custom datasets for [Topic] using web scraping and data cleaning.
- Current Focus: Implementing Regression and Classification models using Scikit-learn and Pandas.
- GitHub Repository: [Machine-Learning]

### 3. Web Development & UI Design

- Interactive Web Games: Developed browser-based games and event-driven programming using JavaScript.
- Frontend Foundations: Completed 20+ structured UI modules including responsive layouts and interactive components using HTML5 and CSS3.
- Project Repository: []

### 4. Python Logic & Application Development

- Banking System Simulation: Built a terminal-based Banking App implementing OOP to manage user accounts, transactions, and balance updates.
- Logic-Based Tooling: Developed several "mini-apps" to solve real-world logic problems, focusing on clean code and efficient Python syntax.
- Project Repository: []
